

PL/SQL Exercise 3: Stored Procedures :

The screenshot shows the FreeSQL web interface with a worksheet containing the following PL/SQL code:

```
1 SET SERVEROUTPUT ON;
2
3 -- Scenario 1: Apply 1% monthly interest to all savings accounts
4 -- =====
5 CREATE OR REPLACE PROCEDURE ProcessMonthlyInterest
6 IS
7 BEGIN
8   UPDATE Accounts
9   SET Balance = Balance + (Balance * 0.01),
10      LastModified = SYSDATE
11   WHERE AccountType = 'Savings';
12   DBMS_OUTPUT.PUT_LINE('Savings account(s) updated with monthly interest.');
```

The interface includes a Navigator panel on the left with a tree view of database objects (ACCOUNTS, CUSTOMERS, EMPLOYEES, LOANS, TRANSACTIONS) and a right sidebar with a search bar and a list of SQL Tutorials.

The screenshot shows the FreeSQL web interface with the same worksheet as the previous image, but now with the following PL/SQL code:

```
1 BEGIN
2   ProcessMonthlyInterest();
3 END;
4
5
6 BEGIN
7   UpdateEmployeeBonus('HR', 10);
8 END;
9
10
11 BEGIN
12   TransferFunds(1, 2, 500);
13 END;
14
15
16 BEGIN
17   TransferFunds(2, 1, 999999);
18 END;
19
```

The interface shows the execution of these procedures. The DBMS output at the bottom displays the results of the queries, including the message "Savings account(s) updated with monthly interest." and the results of the TransferFunds procedure.
